

Swift

Facility Maintenance Ltd

Project
CASE STUDY

Client: Babcock

Business:

Site: Gibraltar Barracks

Work undertaken:
Provide welfare to exist-
ing cabin.

Value: 12K

Work period: 6 Weeks
inclusive of lead time.

Additional Welfare Accommodation

Babcock is the UK's leading engineering support services organisation with a revenue of circa £3billion in 2010 and an order book in excess of £12 billion. The company works within the defence, energy, telecommunications, transport and education sectors.

An existing temporary portacabin was being used as Holdfast reception at the Gibraltar Barracks in Camberley and required welfare facilities. We were asked to procure and project manage the supply and installation of a welfare annex to the rear of the existing cabin and to ensure it was in keeping with the existing unit.

Swift purchased an appropriate unit fit for purpose. The unit contained two W.C.s and a kitchen area.

Before delivery the footprint base was prepared with brick piers, power supply, fresh water and drainage installed to serve the welfare area.

The new unit was craned into place and **Swift** seamlessly connected the two units, ensuring it was weather tight and all services working correctly.

A rodent barrier/skirting was bespoke fitted and the existing steps adapted to suit a new location saving time and money. An O&M manual was handed to the client on completion.
